## BACKGROUND OF THE Synergy Summit

After 2 years of school closures due to COVID-19, primary school teachers in a government school are struggling to bring their children up to grade level in a short time. Children in grades 1 and 2 are entering school for the first time with little to no pre-schooling. Many children in grades 3-5 have also lost FLN skills and are unable to grasp their grade-level curriculum. Further, government schools are seeing increased enrolments as many children have shifted from budget private to government schools due to financial distress. The majority of government and non-government school teachers are facing an unprecedented burden and suffering from limited capacity on addressing this FLN crisis for so many children in a short time.

The New Education Policy 2020 of India places the highest importance on FLN, "The rest of this Policy will become relevant for our students only if this most basic learning requirement is first achieved."

To this end, National Initiative for Proficiency in Reading with Understanding and Numeracy, or NIPUN Bharat scheme was launched in 2021 "to ensure that every child in India gains foundational numeracy and literacy by the end of Grade 3. NIPUN Bharat further focuses on transforming the monotonous education system into an integrated, enjoyable, all-inclusive and engaging."

One more year without FLN can add to the disaster caused by the nearly two years of school closures. According to UNICEF, COVID has wiped out years of progress. Worldwide nearly 70% of the 10-year-olds unable to read, write or do basic numeracy. According to Azim Premji University Survey, 92% of the children in India have lost at least one language ability in literacy and 82% in numeracy.

The speed with which children learn is more relevant today than ever before. Typically, even after three years of being in school, or by the end of Grade 3, up to 75% of the children could not read pre-Pandemic.

A massive effort is thus required combined with new and highly disruptive methods of teaching and learning that clearly demonstrate they are effective in accelerating literacy, improving accountability, creating transparency and are joyful, all-inclusive and engaging. This requires collaboration at all levels, pilots of new ideas, and collection of evidence.

The Synergy Summit focused on how to achieve these goals and accelerate Foundational Literacy and Numeracy for all children.

Top leading senior policymakers, ambassadors, heads of international and national NGOs, corporations, donor-agencies, and change-makers from India and overseas joined 'THE SYNERGY SUMMIT 2.0' to come together and synergize for the literacy movement.

Synergy Summit 2.0, India's most strategic summit, on Accelerating Foundational Literacy and Numeracy: Making India 100% Literate before the deadline of 2026/27 in support of Government's NIPUN Bharat Mission took place on 11-12th January 2024, at India Habitat Center, New Delhi. The Chief Guest of the two day summit was Mr. K P Fabian, Former Ambassador of India to Qatar and Mr. Ganesh Reddy, Joint Secretary, UN Global Compact Network-India.

# Inaugural Session

The summit was inaugurated by the Chief Guest, Mr. K P Fabian, Former Ambassador of India to Qatar in the presence of Kumari Aarti Jadeja, Rani of Bhuj, Gujarat, Mr. Sudarshan Suchi, CEO, Bal Raksha Bharat, Mr. Ganesh Reddy, Joint Secretary, UNGCI, Mr. Sanjay Kashyap, Director, GAIL, Mr. Azadar H. Khan, Senior VP- CSR, Sun Pharmaceutical Industries Ltd. and other dignitaries. Hon'ble Defence Minister of India Rajnath Singh and Dr. Sunita Gandhi, CEO of DEVI Sansthan virtually graced the event and shared their thoughts through a video message.

**The two-day summit saw active participation and discussions on FLN by various lead organizations.**

**Shri Rajnath Singh**

**Hon'ble Defense Minister**

**Hon'ble Union Defense Minister Shri Rajnath Singh** appreciating the efforts of DEVI Sansthan in his video recorded message commented, If you think education is expensive, try ignorance, try adopting illiteracy for once. It will prove to be more expensive for us than investing in education.

FLN is conceptualized as one's ability to read basic text with understanding and solve basic math. It is an indispensable pre requisite for all future schooling and practical life outcomes. It is also one of the most important element of socio-economic transformation from individual to social, national and international level, be it public health or employment opportunities, social equality or civic participation, literacy and numeracy is a basic requirement in every field.

Human resource is the biggest asset of any nation, the condition and direction of any country to a great extent depends on the quality of its human resource and the condition of human resource depends on what are the education and health results of the country. The United Nations has set sustainable development goals for the world towards ensuring completely free and equitable primary and secondary education of all children, the UN has set a deadline of 2030 to achieve this goal.

The pandemic has done the work of disrupting our existing education system, then to overcome it, we need to use disruptive technologies in literacy and numeracy. We need to take the FLN levels not only to the pre pandemic levels but also to a much higher standard.

The Government is also proactively and diligently working towards improving FLN

outcomes among children. You all here must be aware of the visionary approach NIPUN Bharat adopted in our National Education Policy 2020.

Discussing ideas of disruptive learning and promoting them if found useful is the need of the day. In this direction, I would like to mention the concept of Accelerating Learning for All, ALfA, which is being run in different parts of the country and the world. I was told that through this program, it is possible to make children and adults reading capable in 45 days and fully FLN capable in just 90 (45+45) days. I hope that in the coming times, this program becomes more successful and gets a wider reach.

I am certain that you will come up with suggestions and ideas to improve FLN outcomes for children and adults in a relatively short period of time.

“

If 90 days could make  
the world literate, would  
you not do it? ”

## Dr Sunita Gandhi

### Founder & CEO, DEVI Sansthan

Dr Sunita Gandhi, CEO of DEVI Sansthan in her virtual presence, welcomed the participants and in her message quoted “Literacy is a lift all and a lift off for all SDGs”

About 70% of the children in low- and middle-income countries cannot read since the pandemic. Unfortunately, the situation was far from ideal, even before the crisis. We need to ask ourselves that how is it that hundreds and millions of children are unable to read even after completing 5 years of schooling. We are facing a global literacy emergency; this requires new action immediately. The question is What?

We believe a key factor in this crisis is the lack of transformative pedagogy, outdated teaching methods, are holding back the future of the majority of the world's children. After 8 years of experimentation and refinement, we have developed a program called ALfA Accelerating learning for All. It is 10x faster and adults are becoming both literate and numerate in 45 days. ALfA fosters by design the six C skills of collaboration, communication, creativity, character, critical thinking and world citizenship. ALfA does not rely on unknown sight words; it

also does not teach letters and sounds in isolation. Learning to read begins with the identification of known pictures and corresponding first sounds, children add sounds to complete words from the very beginning, they work in pairs and take turns to make new words, we have discovered that the children learn faster this way, without the need for letter recognition, children save two years.

An ALfA teacher, acts merely as a galvanizer and the program is tailored for paired learning and prior knowledge of students. The results from ALfA have recently been printed in a book by Harvard Graduate School of Education. In the first Randomized Control Trial for government schools, the effect size for Grade 3 was 0.23 and for Grade 5 it was 0.89 just after 40 days of ALfA.

Dr Gandhi gave a brief on programs and initiatives of DEVI Sansthan and welcomed the participants of Synergy Summit 2.0 saying, when we join forces and synergise, we multiply the impact.

# CHIEF GUESTS

**Address by Chief Guest of the  
First Day of the Summit**

**Mr. KP Fabian**

**Former Indian Ambassador and Diplomat**

The gathering was then addressed by the Chief Guest, Sir K P Fabian, Former Indian Ambassador and Diplomat. He stated, "Synergy summit marks our determination to continue our endeavor to achieve universal literacy and numeracy as early as possible without waiting for 2030. There is a need to transform official attitudes in position."

He further added, "UNESCO has estimated that 500 hours are needed to make a learner literate and numerate, in this direction I would like to mention that the ALfA method of DEVI Sansthan takes only 180 hours to make any learner foundationally literate and numerate, not even half of 500. Secondly, UNESCO has

estimated that to achieve FLN in certain number of disadvantaged countries, 14 billion dollars is required. There is a donor fatigue that needs to be addressed through synergy. We have to continue to work together towards achieving the literacy goals in synergy."

**Address by Chief Guest of the Second Day of the Summit**

**Mr. Ganesh Reddy, Joint Secretary**

**UN Global Compact Network-India**

Focused on development of teachers and not just teaching of children but also grooming them to make them a better world citizen. It is important that the children not only learn but also understand what they are being taught. He also focused on community engagement for levelling the gap of drop outs. He complimented, I strongly believe that this summit will lay a foundation for a better planet, adding that children are our future leaders and it is duty to prepare them well for a better future.
